THE AUTHENTIC ITALIAN HELMET BRAND SINCE 1974

A constant look to the future together with captivating design, avant-garde technology and breakthrough innovation led to conceive and produce numerous successful models with innovative features appreciated and well recognized by bikers all around the world.

Caberg has been the first Italian company to introduce a flip up helmet (system helmet) on the market, and the second one worldwide, mainly believing on the great growth potential of the touring market. During the years, the strength point of Caberg has been focusing on smart helmets by combining look with functionality. Care of our premises, located in a modern building, are concentrated the management, the production department and a test laboratory, which guarantees successful conformity tests required by the law, so that the products will offer the highest safety and top comfort to the motorcyclist.

The production is constantly checked through a severe quality test process that has guaranteed at 8 range models to be awarded with an excellent score by the SHARP safety test done by the U.K. Department of Transport.

The commercial network reaches most of the European markets and it is present in various non-European countries such as Turkey, Israel, Kuwait, Russia, Hong Kong, Taiwan, Indonesia, Malaysia, New Zealand, Mexico and many others South American states.

SAFETY & TECHNOLOGY

Thanks to a modern certified laboratory Caberg can make internally not only all routine test required by the regulation ece 22.05, but also additional test to verify new materials and technical solution in order to improve helmets safety. The laboratory is also equipped with instruments to ensure and check components reliability with stress testing and periodical test for durability.

The four basics types test required by International Standards are the shock absorption, rigidity, deformation of the retention system, and the rotation stability.

The "shock absorption test" determines the capacity of an helmet to absorb and dissipate the energy of a blow. During the test the deceleration of a helmet gauged headform falling free onto an anvil at given speed is measured.

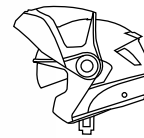

The "rigidity test" measures the maximal and residual deformation of a helmet submitted to lateral or longitudinal compression.

The "retention system test" measures the maximal and residual elongation of the chinstrap of a helmet submitted to dynamic stress at a given energy. The stability measures the roll-off angle of a helmet submitted to a dynamic rotational face.

COLLECTION 2022

FLIP-UP

- 10 Levo
- 12 Horus
- 14 Droid
- 16 Duke II
- 18 Tourmax
- 20 Sintesi

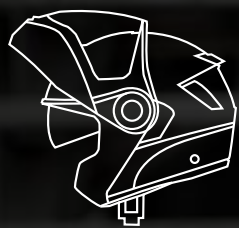

FULL FACE

- 24 Drift Evo
- 26 Avalon
- 28 Xtrace

JET

- 32 Flyon
- 34 Ghost
- 36 Uptown
- 38 Freeride
- 40 Riviera V4

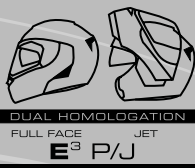

FLIP-UP

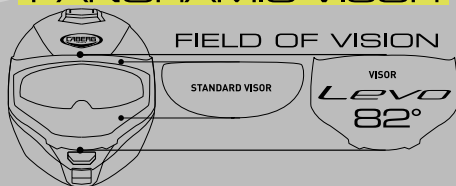

FLIP-UP LEVO

FEATURES

Fiberglass shell
Carbon shell: Levo Carbon version
Double shell size XS-XXL
Intercom ready
Just Speak Evo ready
Fitted with Pinlock Max Vision lens

Models may vary and not be available in all markets. As part of its policy of continuous product improvement, Caberg reserves the right to change the specifications of its products in the light of new technologies or to meet the needs of new standards. Please contact your dealer for further information.

Die Modelle können variieren und nicht in allen Ländern verfügbar sein. Caberg behält sich das Recht vor, jederzeit ohne Vorankündigung, aufgrund des technischen Standes oder der Typenprüfung erforderliche Änderungen vorzunehmen. Für weitere Informationen wenden Sie sich bitte an den Händler Ihres Vertrauens.

Les modèles peuvent changer n'étant pas disponibles dans tous les pays. Caberg se réserve d'apporter, sans aucun préavis, les modifications nécessaires pour raison d'homologation.

Pour d'autres renseignements, prière de contacter votre détaillant habituel.

WARNING

WARNING: these helmets are not homologated for use in the United States of America and Canada. These helmets have been homologated according to the European Standard requirement ECE/ONU 22.05. Therefore the use of these helmets is allowed only in the countries/nations where the homologation standard ECE/ONU 22.05 is in force.

ATTENZIONE: questi caschi non possono essere usati negli USA e in Canada. I caschi sono stati omologati secondo quanto stabilito dalla normativa Europea ECE/ONU 22.05 e ne è quindi consentito l'uso soltanto nei Paesi in cui è in vigore la normativa ECE/ONU 22.05.
